

Save Up To 60% On AI Models & Cloud Infrastructure

We buy unused SaaS credits, you get them at a fraction of the cost

The Problem

The hidden cost of unused credits

Companies over-purchase credits from
OpenAI, AWS, Claude, e.t.c

No secure peer-to-peer resale system
exists for these unused resources

Meanwhile, startups struggle to afford
the credits they urgently need

This leads to digital waste, burned
budgets, and lost runway.

Credex is the verified marketplace for SaaS/API credits & infra

it is a secure marketplace where trusted teams can buy or sell unused API & SaaS credits (like OpenAI, Claude, AWS, GCP)

✓ No infrastructure change ✓ No shady deals ✓ Just verified value

Verified
Sellers

Safe
Transfers

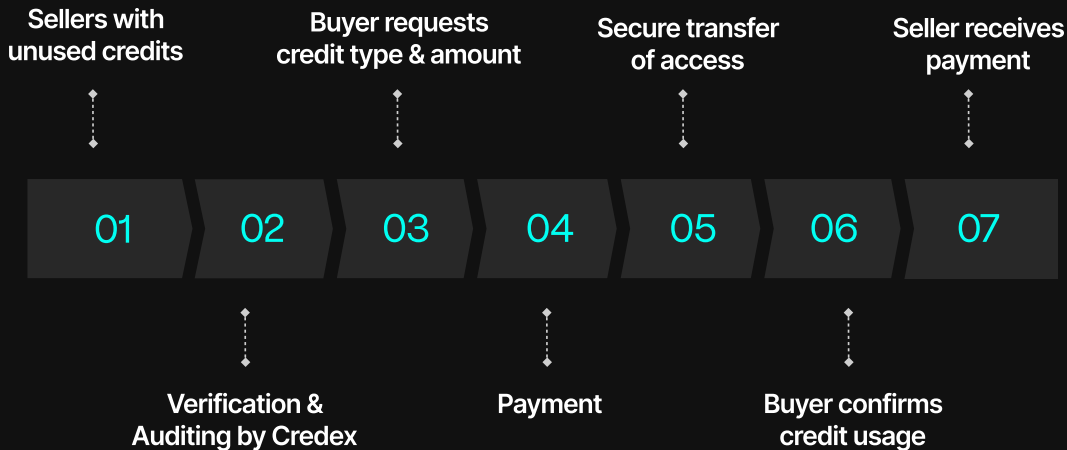

Transparent
Pricing

Zero loss of
performance

How Credex works?

Same Credits, More trust

These are real credits, like prepaid cloud or API credits you use to run your infra

Our role

verifying source ownership and ensuring
authentic access

You're using the same credits from the same providers,
just at a better rate

How we ensure every deal is legit

01

Vendor Verification

We onboard only verified companies – no third party resellers

02

Ownership Auditing

We track the history of every credit/ token to avoid expired or misused ones

03

Transaction Transparency

Full history, support chat, escrow protection and manual checks

04

Scaling Automation

Ongoing development of in-house credit authentication & verification tools

Saving cash, fighting waste, power sustainability

This isn't just cost saving, it's impact-led SaaS sustainability

1. Reclaim lost spend and increase financial agility
2. Give unused credits a second life
3. Help startups grow without breaking the bank
4. Reduce environmental impact caused by redundant infrastructure and digital waste

CASE STUDY

Unused credits boosts profitability by 50%

THE PROBLEM

A fast-scaling India-based agency built 20+ AI tools (lead bots, refund copilots, etc.) – but was burning \$17k/month on LLLM credits

THE FIX

They switched to Credex for surplus GPT-5 & Claude credits at up to 50% off retail, with:

- Full API compatibility (no code changes)
- Improved project-level margins by 50%
- Locked in usage costs for predictable pricing

THE RESULT

Now they scale confidently, automate more for clients, and protect profits

**Want to scale your AI tools
without blowing up costs?**
